EDUCATION

University of Wisconsin-Madison

Master of Science in Computer Science

Madison, WI

Jun 2020 – Dec 2023

University of Cincinnati

Bachelor of Science in Chemical Engineering

Cincinnati, OH

Aug 2012 – May 2017

EXPERIENCE

DevOps Engineer

Charter Communications

Jun 2025 – Present

Madison, WI

- Developed Terraform modules and CI/CD components used across multiple teams, ensuring consistent AWS infrastructure provisioning at production scale.
- Collaborated with cross-functional teams to implement automation in provisioning and deployment, ensuring consistency across AWS environments.
- Built and enhanced Kubernetes/EKS and Helm deployment modules, including tagging automation for Datadog integration and reference pipelines for new SpringBoot applications.
- Initiated and implemented automated testing for CI/CD components, including linting, unit tests, and validation pipelines, improving reliability and preventing regressions across production workflows.

Software Engineering Associate

Charter Communications

Jun 2024 – Jun 2025

Madison, WI

- Rotated across cloud, security, and application teams; delivered Terraform modules and Ansible playbooks for secure AWS instance provisioning.
- Optimized React and Angular applications, improving system efficiency and user experience for video and network management tools.
- Developed Spring Boot microservices enabling reliable device reprovisioning and inter-service data transfer.

Analytics and Automation Intern

Charter Communications

Jun 2023 – Aug 2023

Denver, CO

- Automated Kubernetes cluster bootstrapping using Ansible and deployed ArgoCD for GitOps workflows; developed Python controller for DNS synchronization and TLS certificate management.

Data Engineer

University of Wisconsin-Madison

Jan 2024 – Jun 2024

Madison, WI

- Automated SQL data extraction and storage workflows using Python and Azure, ensuring reliable data delivery for research teams in the School of Medicine and Public Health.

Analytics Technical Solutions Engineer

Epic Systems Corporation

Jul 2017 – Sep 2022

Madison, WI

- Built dashboards and monitoring tools to provide near real-time visibility into reporting system health and performance.
- Monitored and analyzed system-wide error logs, proactively identifying risks and improving system reliability across multiple hospital systems.
- Guided customer teams in complex application workflows and hierarchical data structures, improving troubleshooting speed and team efficiency.
- Trained new employees and internal teams on system functionality, enabling faster onboarding and stronger knowledge sharing.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, C++, Bash/Shell

Infrastructure and Automation: Terraform, GitLab CI/CD, Kubernetes, Helm, Ansible

Cloud Platforms: AWS, GCP, Azure

Data and Distributed Systems: SQL, Apache Spark, Apache Kafka
